Unemployment

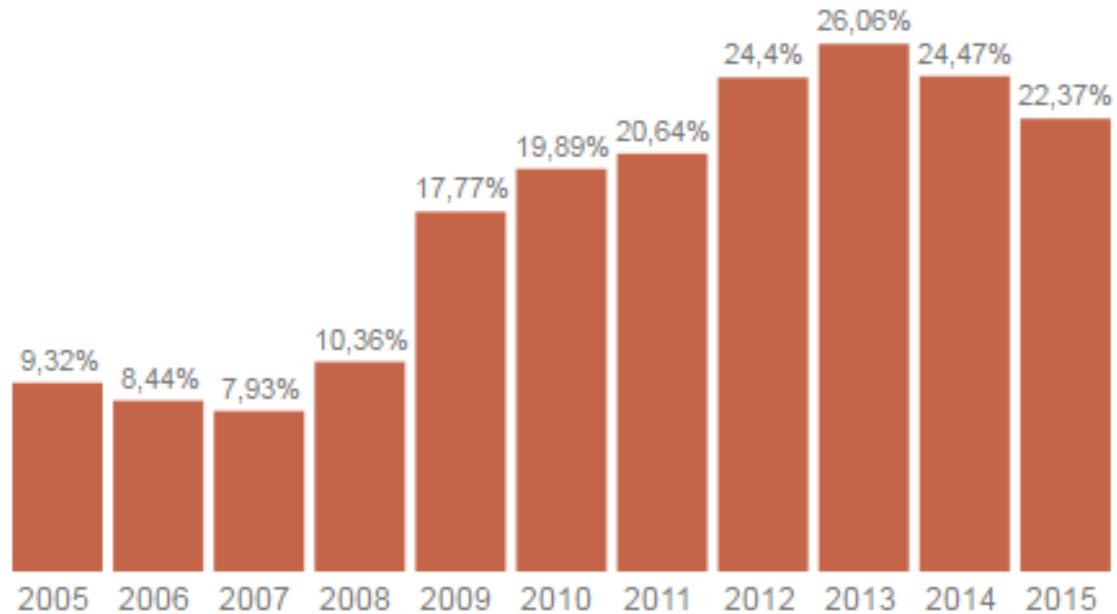

UNEMPLOYMENT

Unemployment in Spain

TASA DE PARO INTERTRIMESTRAL
Trimestre II

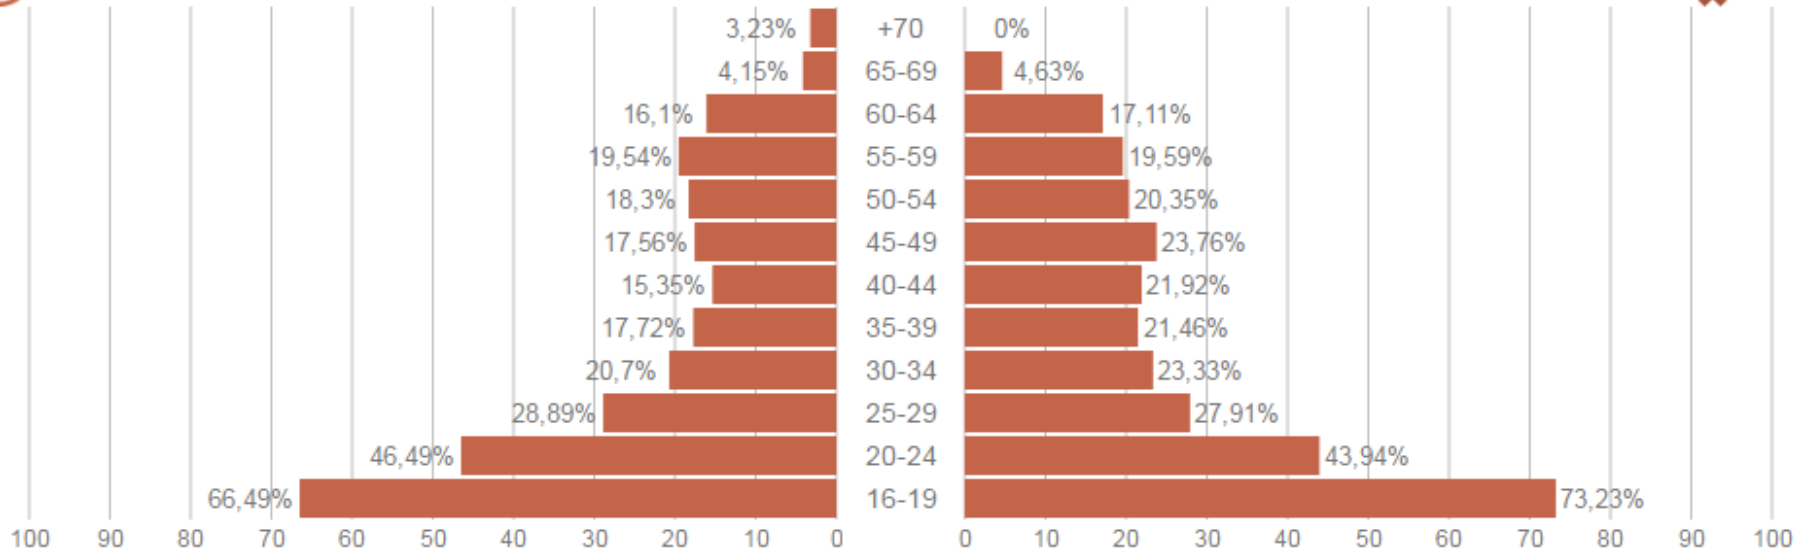

In this graph we can see unemployment in Spain during 10 years. In 2007 the “crisis” started.

Ages and sex

Hombres

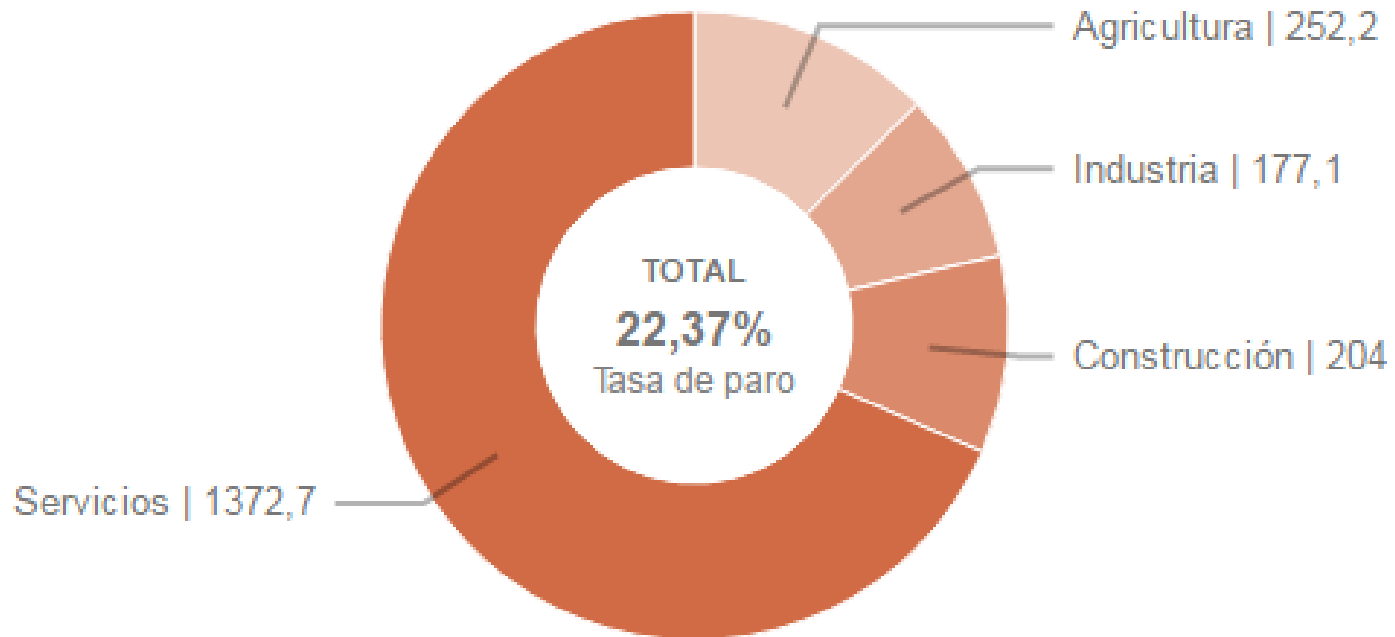

Mujeres

In this graph we can see that women have less job than the men in Spain. Also we can see that people aged between 16-19 have the most unemployment.

Economic Sectors

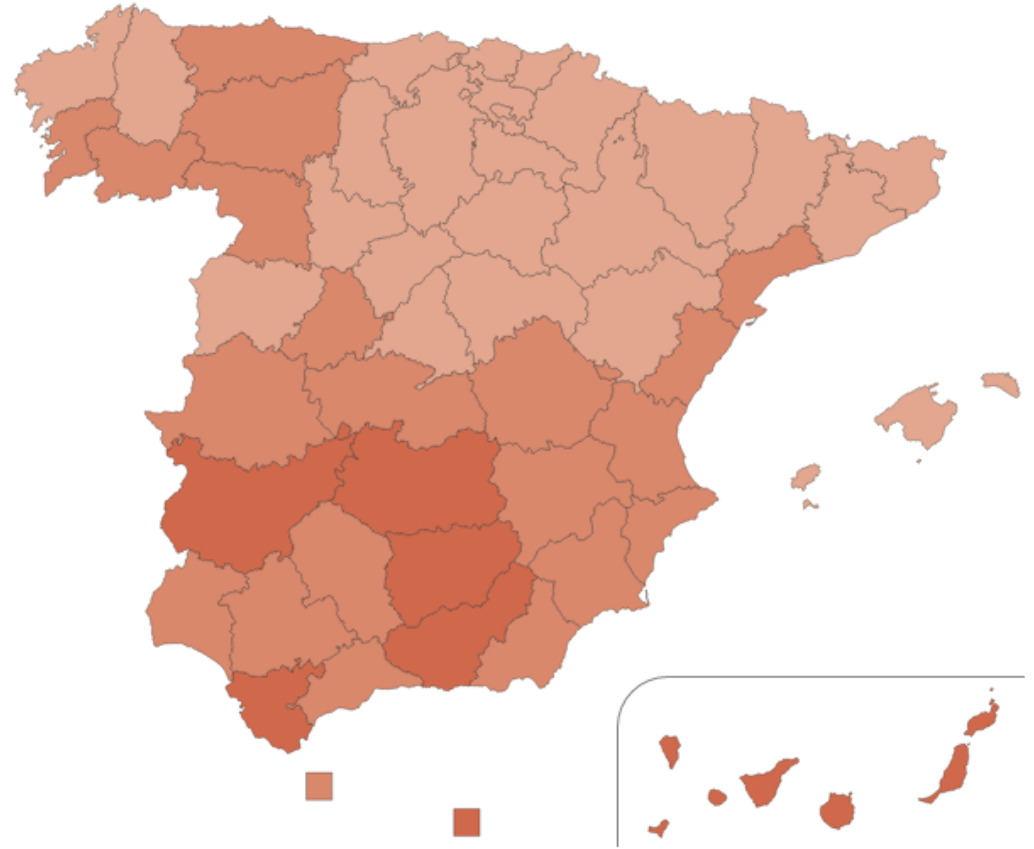

In this graphic we can see that the economic sector with more unemployment in Spain is the service sector and with less unemployment is the industry sector.

Geographical areas

Trimestre II
2015

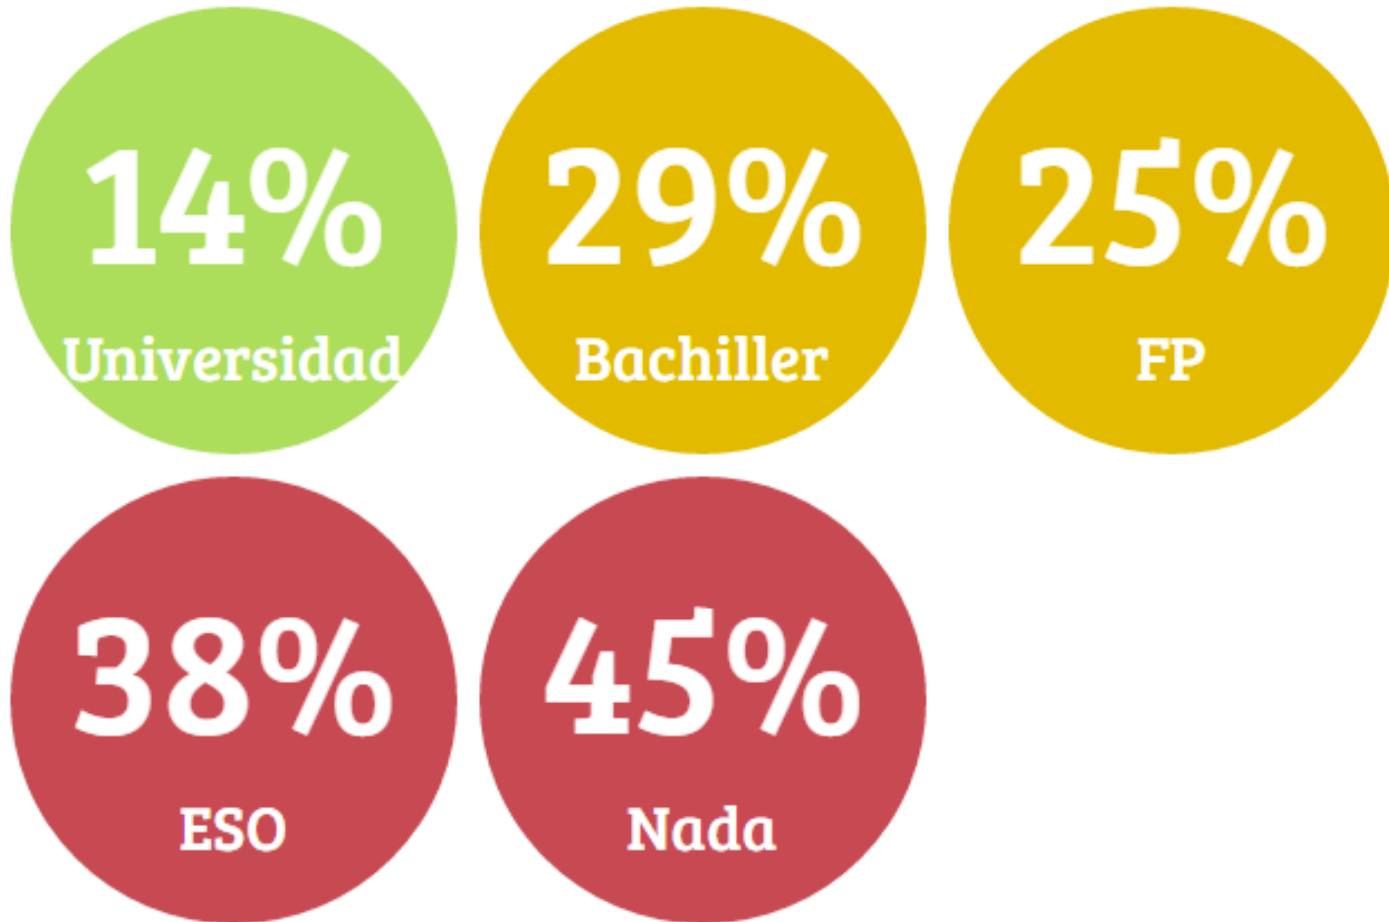

22,37%
media nacional

- + 37,32%
Cádiz
- 12,55%
Navarra

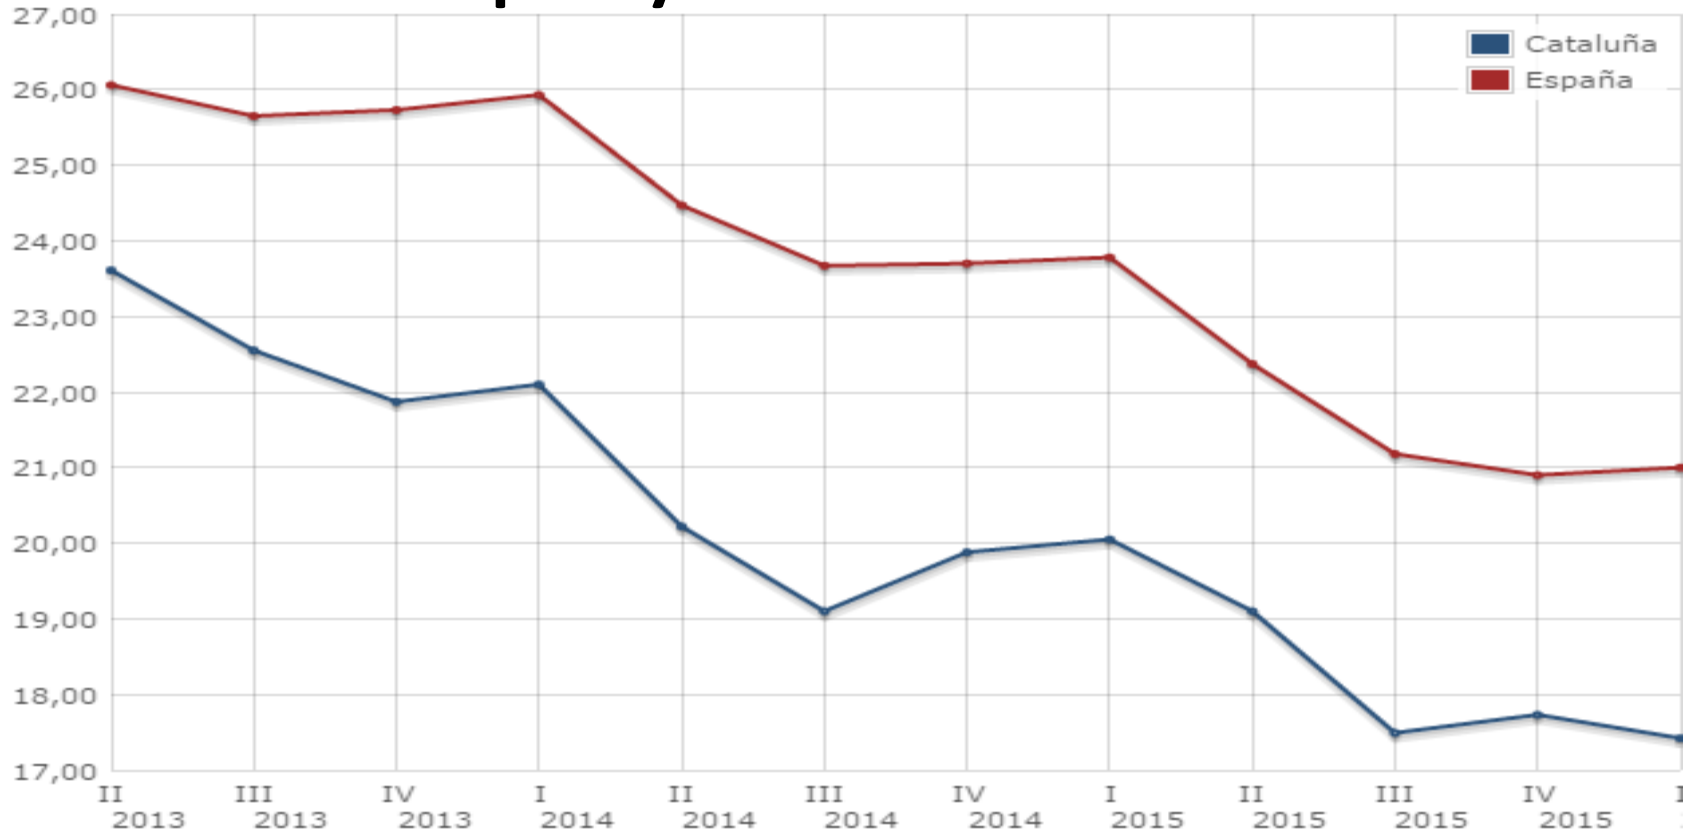

In that graph we can see unemployment in the different regions of Spain. The region with most unemployment is Cadiz in Andalucia(37,2%) and the less unemployment is in Navarra(12,55%). Barcelona, in Catalonia, has 19,97%.

Training-Education

In this graph we can see the relationship between studies and unemployment.

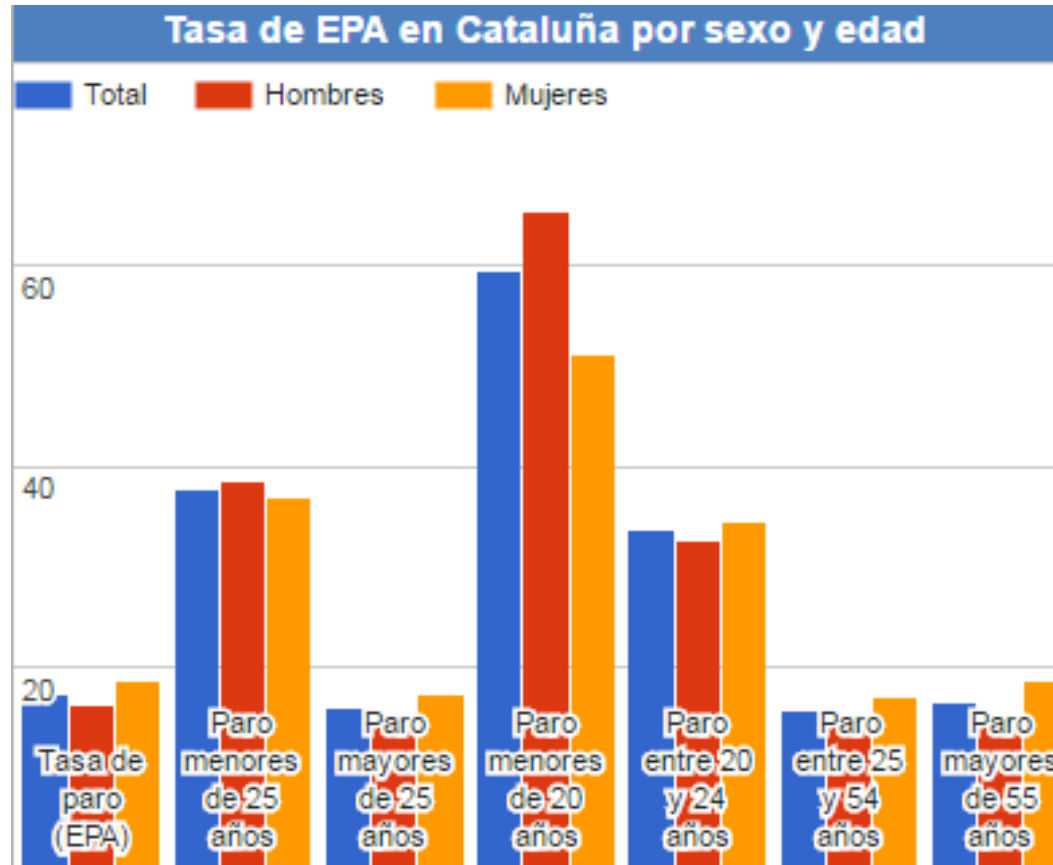

Unemployment in Catalonia

In this graph we can see unemployment in Catalunya (blue) between 2013 and 2016.

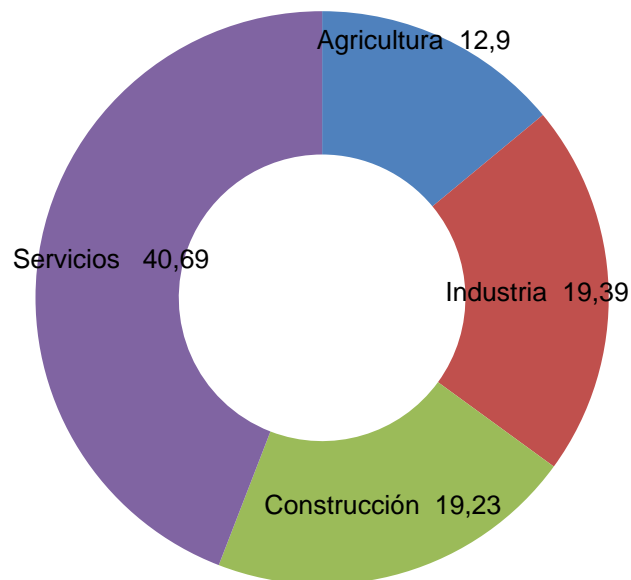

Ages and sex

We can see unemployment in Catalonia according to age and sex of the population.

Economic sectors

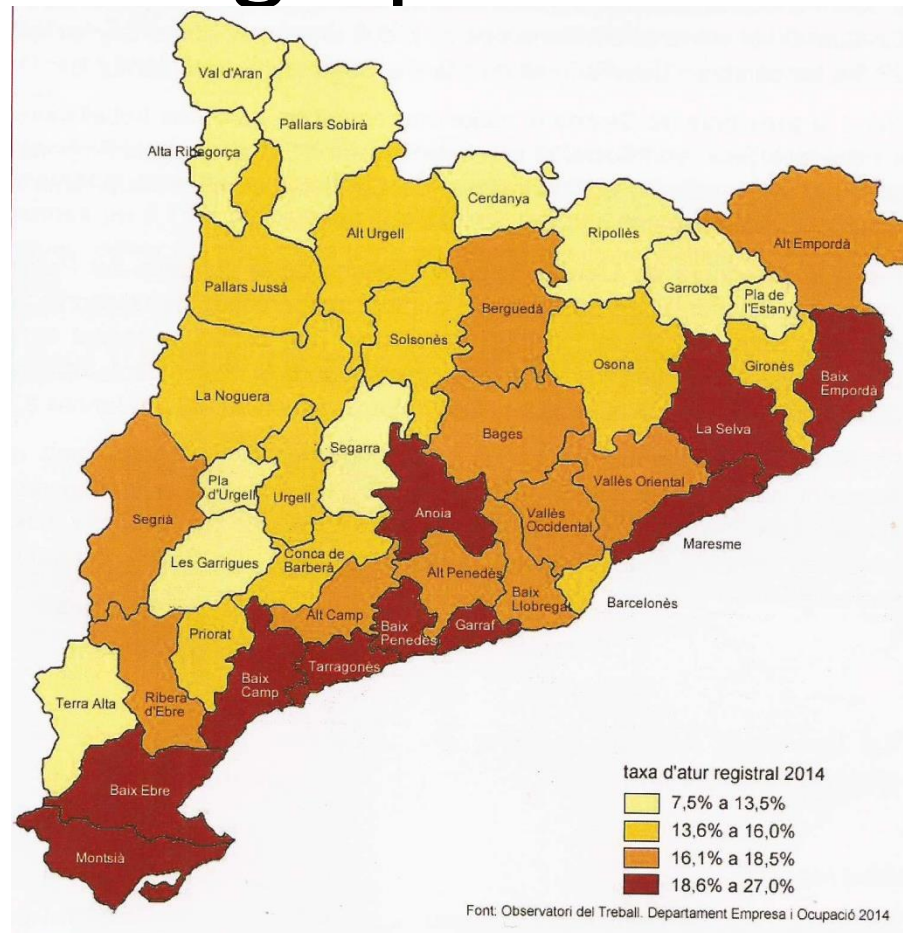

Título del gráfico

In this chart we can see that the economic sector with more unemployment in Catalonia is the service sector and with less unemployment is the farming sector (year 2015).

Geographical areas

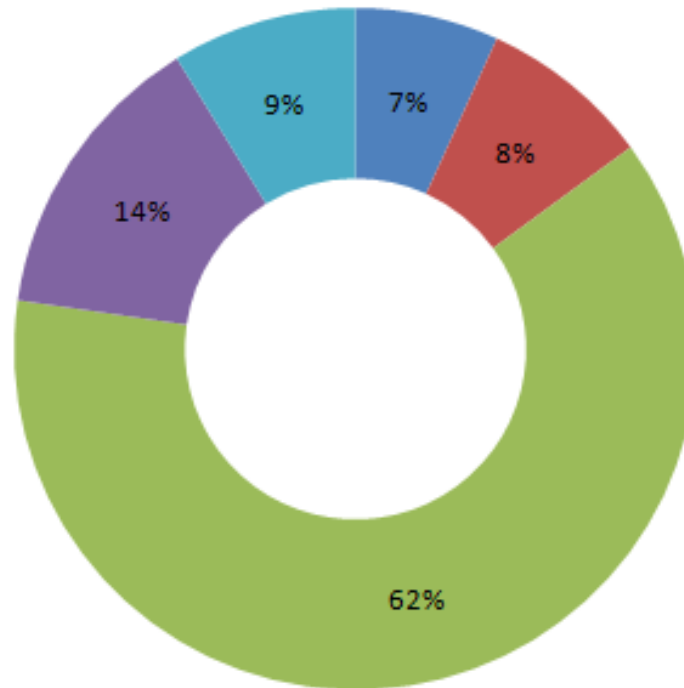

The areas that are near the sea have more unemployment than the other areas.

Training -Education

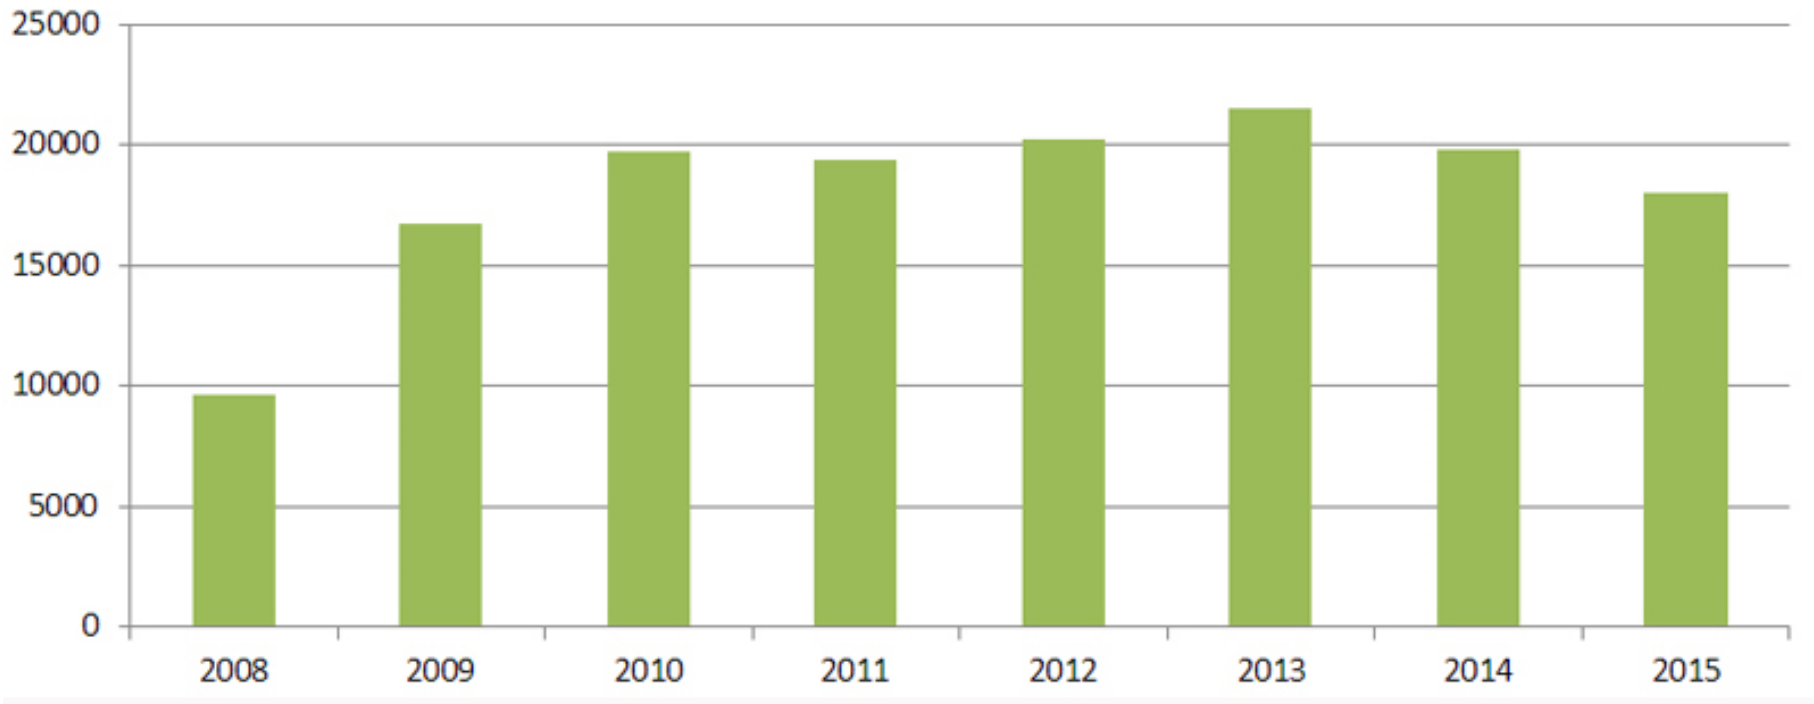

■ Sense estudis ■ Educació primària ■ ESO ■ Educació Superior ■ FP

We can see that the people who only have “ESO” (compulsory secondary studies) have the most unemployment.

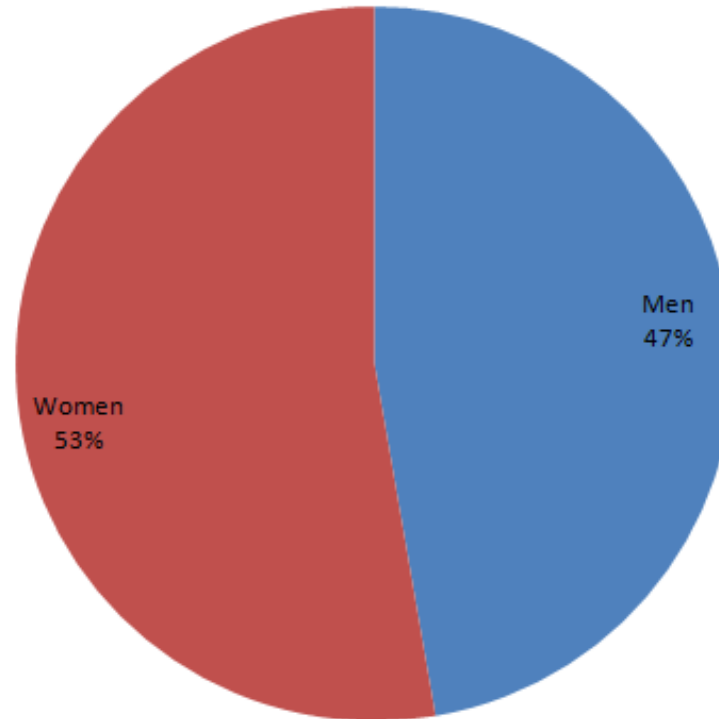

Unemployment in Sabadell

We can see unemployment in Sabadell during 8 years.

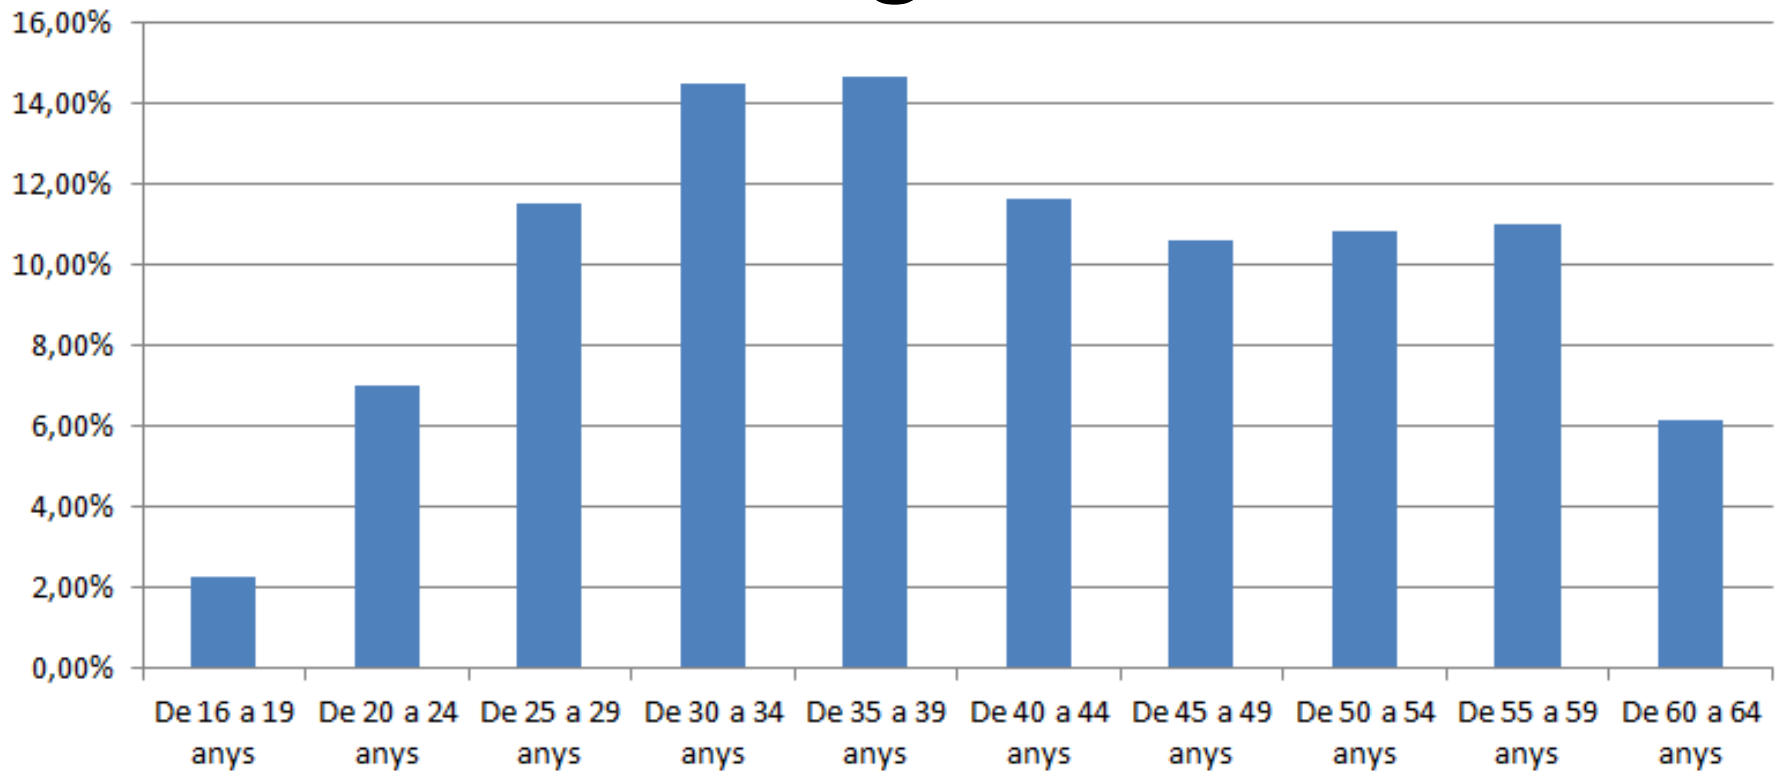

Sex

We can see that in Sabadell women have more unemployment than the men.

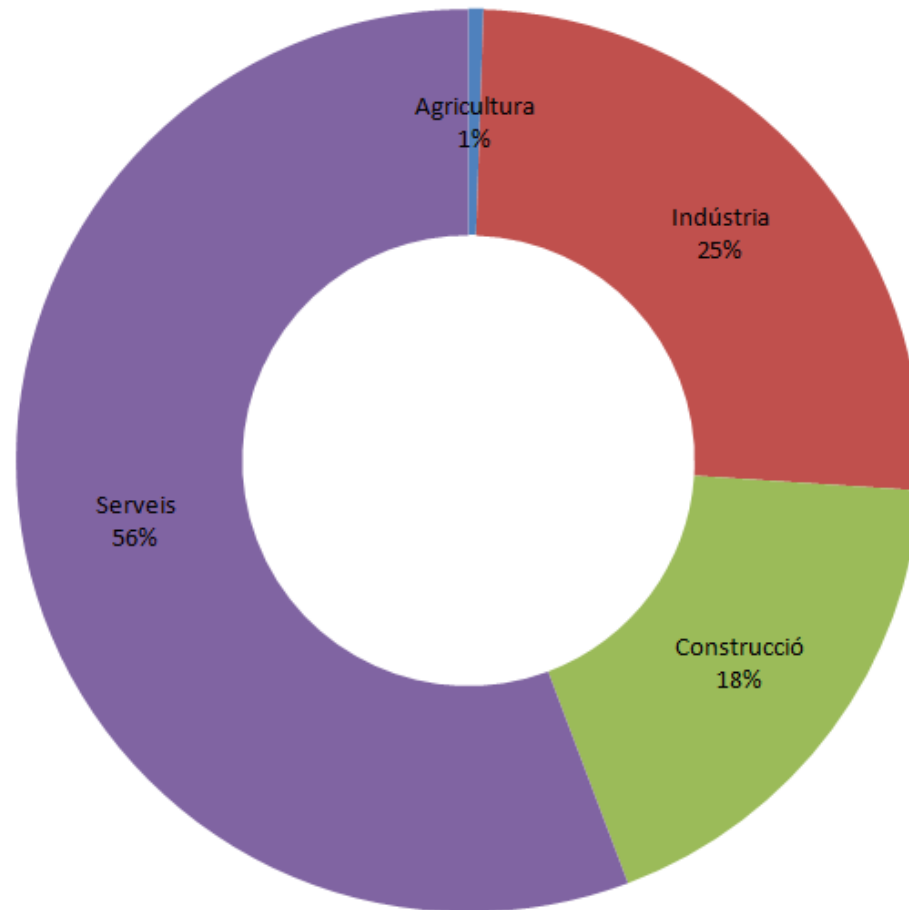

Age

In this graphic we can see the relation with the age and unemployemnt. The people beetwen 30 years and 39 years have the most unemployment.

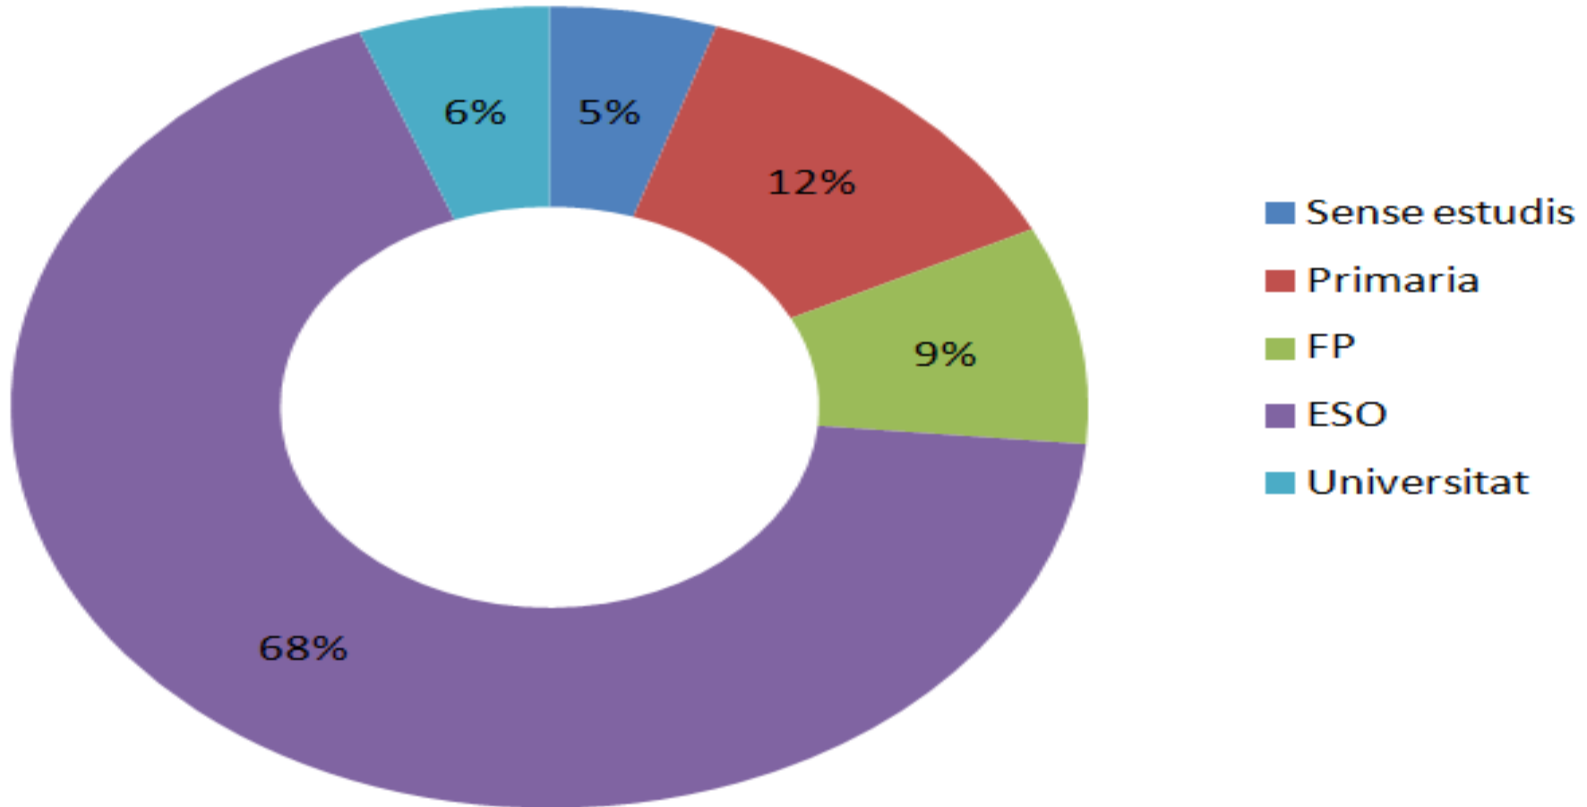

Economic sectors

The economic sector with most unemployment is the service sector, and with less unemployment is the farming sector.

Training -Education

The people who only have ESO have the most unemployment and the people who don't have studies have the less unemployment. This is because in Sabadell the most part of population have studies.

Thanks for your attention!
